

"Toys are children's words and play is their language."

Dr. Garry Landreth

What is play therapy?

- Using play as an invaluable form of communication to let children express thoughts and feelings
- An intervention that facilitates children's well-being and addresses and treats their emotional, behavioural, developmental and adaptive issues

Are you considering?

- Learning play therapy to support child mental health
- Further study on childcare and already with a background of counselling, education, psychology, social work or nursing
- Gaining culturally-relevant professional knowledge of psychotherapy for children in special educational needs (SEN) including attention deficit, hyperactivity disorder, autism spectrum disorder, physical disability and mental illness etc.

What Facilities and Laboratories

Our two play rooms are well equipped with toys and materials such as doll houses, kitchens, cashiers, puppets, animal families, medical kits, soldiers, handcuffs, sandboxes, paints, musical instruments, costumes, etc. And multiple cameras are installed to observe the children's behaviours for the practice, supervision and research. The nearby parent consultation areas let therapists explain the therapy process and suggest how the parents can engage. Other laboratories such as Counselling and Research Centre, Practice-based Evidence laboratory, Psychological Lab Studio of Arts and Creativity and Neuropsychology Laboratory also support the development of evidence-based practice and research of play therapy.

Programme Duration:

2 Years (Full-time) / 3 Years (Part-time)
